ABOUT ME

I'm a full-stack developer and about to graduate as a master student in Computer Science and Engineering in Politecnico di Milano. During my studies I have worked on various projects in different startups, managing the design, development, and deployment of several websites using a wide range of technologies, particularly NodeJS, React, Docker.

I am very passionate about the entire world of software development, lately I have been focusing on Machine Learning, which is the topic of my thesis. One of my major sources of motivation is interacting with people, which prompted me to sharpen my ability to work in a team by focusing on the topic of *efficient communication and public speaking*.

Outside IT, my two biggest passions are sport and traveling.

WORK EXPERIENCE

01/05/2020 – 01/04/2021 – Milan, Italy

Web developer

Seta Capital

Full-stack web development with PHP, Docker, MySQL, Python, AWS. I worked in a distributed team, divided across Europe and China. In particular, I handled the development of the internal CRM of the company using PHP and MySQL, managed the deploy using Docker and AWS, and performed data analysis with Python.

30/05/2015 – 29/04/2020 – Milan, Italy

Web developer

Menuale

A long and amazing working experience that sparked my passion for web development. I started as an intern in the last year of high school, working on the company website assisted by two engineers. I learned a lot about web development, both in terms of technologies (NodeJS, Express, MongoDB, HTML, CSS, Bootstrap, Elasticsearch...) and all the contours needed to maintain and deploy code: Git, Ubuntu, Azure. I continued working in this company throughout almost my entire university career, taking control of the entire IT department when the company pivoted its business model. In this second phase, I was mostly developing and deploying small websites using several different technologies, as I always had the freedom to explore different languages and frameworks for every project. In this period I added Docker and React to my skillset, and I learned how to handle the entire lifecycle of a software development project, from design to DevOps, to maintenance.

Milano

31/05/2014 – 29/06/2014 – Milan, Italy

Software developer

PuntoDoc

My very first working experience, a summer internship during high school in which I worked as a software developer using the .NET framework and C# as a language

Milano, Italy

EDUCATION AND TRAINING

14/09/2019 – 21/12/2021

● Master degree in computer science engineering

Politecnico di Milano

03/10/2016 – 15/09/2019 – Milano, Italy

● Bachelor degree in Computer Science engineering

Politecnico di Milano

Laurea Triennale in ingegneria informatica

01/09/2011 – 05/07/2016 – Milano, Italy

● diploma di istruzione tecnica (informatica)

IIS Luigi Galvani

Programmazione con Framework .NET, linguaggi C# e VB
Sviluppo applicazioni per smartphone: Windows phone e Android
Sviluppo di piccoli siti web (HTML5, JS, CSS, JQuery)

LANGUAGE SKILLS

MOTHER TONGUE(S): Italian

DRIVING LICENCE

● **Driving Licence:** B

COMMUNICATION AND INTERPERSONAL SKILLS

● Communication and interpersonal skills

I find teamwork to be one of the most motivating parts of any job. For this reason, in the last years I have been looking into the topic of efficient communication, body language and public speaking, finding out that great communication skills bring advantages in terms of productivity, trust, and interpersonal relationships. In the future, I want to continue improving myself in this aspect.

● SCORE Project

In a university project, I acted as the SCRUM master in a team of 7 people distributed among 2 universities, Politecnico di Milano (Italy) and MDH (Sweden). The project made it up to the semifinals in an international competition (<http://score-contest.org>).
